

DESCRIPTION

GEA is an innovative in-ground luminaire with unprecedented optical configuration for illuminating entire building facades of up to 59-feet. Its unique Dynamic Wall Wash configuration incorporates three distinct, individually configurable LED rows to deliver an even wall-wash effect for both close-up and distant installations. The elegant stainless steel frame allows for a seamless and discrete integration into pavements, and has a load bearing capacity of up to 6613 pounds. GEA is available in RGBW30K, RGBW40K, Dynamic White, or Static White temperatures of 2700K, 3000K, or 4000K standard. Optional anti-slip lens and internal honeycomb louver are available.

LUMINAIRE INSTALLATION

Due to the unique "Dynamic Wall Wash" Optics of GEA, Griven recommends the following measurements as a guideline for the best optical result.

INSTALLATION GUIDELINES	BUILDING HEIGHT	19.7'	29.5'	39.4'	49.2'	59'
	DISTANCE FROM WALL	3.3'	4.9'	6.6'	8.2'	9.8'
	SPACING BETWEEN FIXTURES	4.3'	6.6'	8.8'	10.8'	13.1'

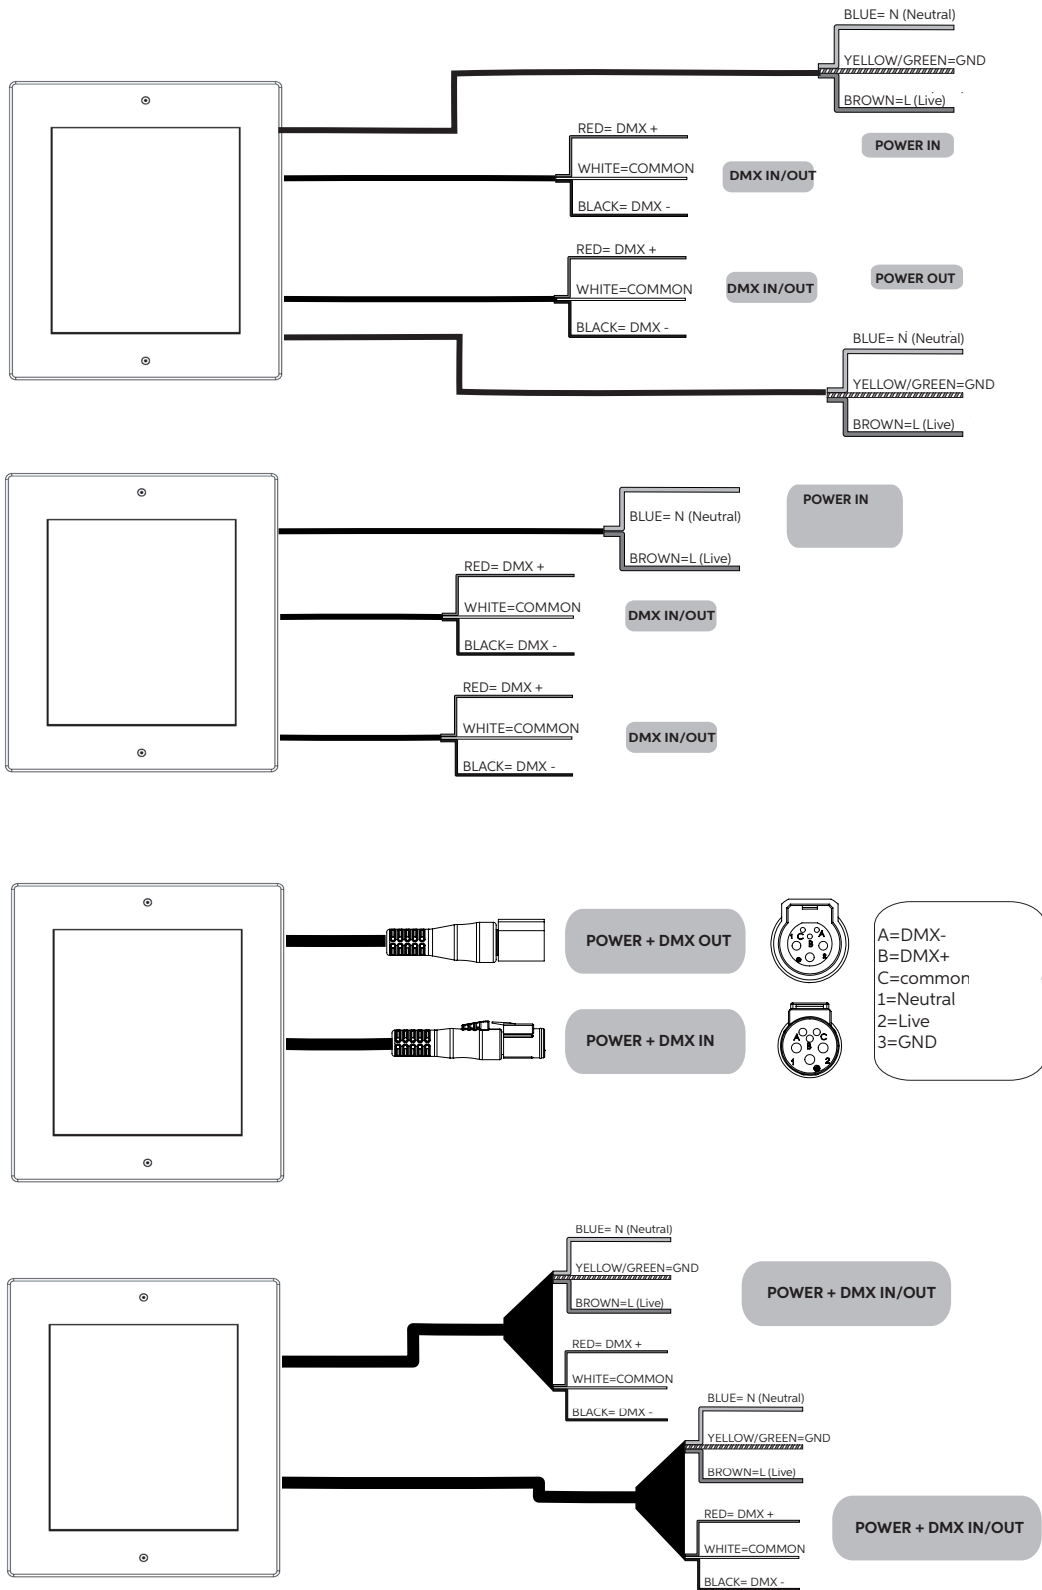

DYNAMIC WALL WASH

Dynamic Wall Wash is an innovative combination of three custom optics placed in separate rows. Rows are independently manageable and ensure optimal light distribution on building facades, exterior walls, or perimeters of historical and modern buildings up to 59' in height.

## CONNECTION

## DMX/RDM PROGRAMMING

STATIC WHITE DMX MODES		
MODE	FUNCTION	VALUE
#1	0-100% Dimmer	0-255
Note: In the absense of DMX signal, LEDs will remain on.		
RDM FUNCTIONS		

When operating in DMX mode, the fixture can accept the following RDM commands:

Discovery: The fixture will signal its own presence (RDM controller will display the fixture on a list.)

DMX Address reading and setting

Channel number reading and setting

On/Off identification: used to identify the fixture you need access to (switches on all LEDs at full output)

Manufacturer: Displays the name of the manufacturer (Griven)
